TamaPoke Player's Guide

For firmware v4.12. How to raise, train and battle with your TamaPoke, and where everything is.

The guide has two parts. **Part 1, the Player's Manual**, explains how each part of the game works, in the order you meet it. **Part 2, the Walkthrough and Strategy Guide**, says where every Pokemon lives, how to beat every leader, and how to win the side games. Read Part 1 once, and keep Part 2 open while you play.

The game holds 1025 Pokemon (984 of them drawn so far), 366 Explore areas in 9 regions, 117 gym leaders, Elite Four members and champions, 58 legendaries with a home, 8 one-off encounters, 30 swarms and 134 TMs plus 10 signature TMs.

Every list in Part 2 and every price in the appendices is generated from the game's own data, so they match the firmware this guide was made with.

> **A note on spoilers.** Part 2 shows what lives where and how to beat each leader. If you would rather find things out by playing, stay in Part 1.

Part 1: Player's Manual

1. Getting started

What you need

- The **Waveshare ESP32-S3-Touch-AMOLED-1.75** board (the round one).
- A **microSD card** in the board, for the Pokemon sprites. Any size works.
- A computer with **Chrome or Edge**, for the web installer.

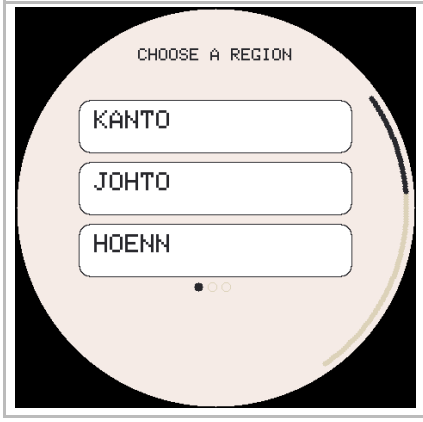

Installing

Open the web installer, plug the board in with a USB cable, and follow the page. It installs the game and copies the **sprite packs** to the card, one pack per region. You can install only Kanto to start and add the others later; a region whose pack is missing shows **NEEDS PACK** and stays locked until you add it.

If you are updating a board that already has a game on it, use **Backup, then install**. It saves your game to a file before it installs anything. Never tick **Erase device**: that is the one thing that wipes a save.

> **PRO TIP:** A black screen right after installing usually means the board is waiting in its download mode, not that something broke. Hold the **PWR** button for about 10 seconds to switch it fully off, then press it again.

Your first minutes

Pick a region	Pick a starter	The egg
		

1. **Pick a region.** The first screen asks which region you want to play. It decides your starter and where your eggs come from. You can change the egg region later.
2. **Pick a starter** from that region's three.
3. **Hatch the egg.** Tap it three times, or wait three minutes and it hatches by itself.
4. **Set the clock.** Tap your Pokemon's name at the top, then **SETTINGS**, then **SET TIME**, and set the hour, the minute and the **day of the week**. Day and night, naps, Friday's Lapras and the daily rotations all follow it.

You start with **5 Poke Balls and 3 Potions**.

2. Finding your way around

The screen is round, so there are no corner buttons. Every screen uses the same four gestures:

Gesture	What it does
Swipe left or right	Move to the next screen along the row below
Swipe up	Go deeper: from your Pokemon, its card
Swipe down	Go **back** one level, from anywhere
Drag along the edge	Turn the page of a list (the bar on the edge shows where you are)

The screens sit in a row, with your Pokemon in the middle:

PLAYER · POKEDEX · MART · PARTY · [your Pokemon] · EXPLORE · GYM · PLAZA

Your own things are on the left and battles are on the right. The row stops at both ends; swiping never closes anything.

Your Pokemon

- **Tap your Pokemon's name** at the top for the menu: STATS, BAG, POKEDEX, SETTINGS, RETIRE and CLOSE.
- **Tap your Pokemon** to pet it.
- **The PWR button:** a short press turns the screen off or on. Holding it for 4 seconds switches the board off. Time still passes while it is off.
- Most screens also have a **BACK** button at the bottom.

3. Caring for your Pokemon

Your Pokemon has four needs, each from 0 to 100: **FOOD**, **JOY**, **ENERGY** and **HYGIENE**. They show as arcs around the edge of the main screen. The four buttons along the bottom look after them.

Button	What it does
Food	A **berry** (three flavors) gives +25 food. A **candy** gives +10 food and +12 joy, but costs a lot of fitness.
Light	Puts it to bed, or wakes it up.
Bath	Cleans up any mess and sets hygiene to 100.
Training	Opens the training games (chapter 5).

Favorite berry. Every species secretly loves one of the three berry flavors. That flavor gives +35 food and +10 joy, raises its bond and costs almost no fitness. Once found, it is shown on the card.

Petting gives +10 joy, then +8, +6, +4, +2, then nothing. Playing one of the joy games (Berry Catch, Memory, Hide and Seek) makes petting fresh again.

Mess. A well-fed Pokemon makes a mess about every hour and a half. Each mess on screen makes hygiene fall faster, so bathe it.

How fast needs fall

While awake, food, energy and joy each fall about **10 an hour**, and hygiene about 7. Joy falls faster when the Pokemon is hungry or dirty, and energy falls twice as fast when it is out of shape.

The 8-hour rule

Get **all four needs to 90 or more**, and you can walk away for **8 hours**. It will be hungry, tired and wanting attention when you come back, but it will not be harmed and cannot run away.

- Only topping up **all four** above 90 starts a fresh 8 hours. One snack does not.
- After the 8 hours, neglect counts. A need at 10 or below is a **care mistake** (at most one an hour). Each mistake delays every evolution by one level and cools your bond.
- With all four needs at **zero for an hour**, it is ready to **run away**. From fully cared for, that takes about 13 hours.

Sleep, naps and the morning

When you press Light	What happens
18:00 to 06:00 (bedtime)	It sleeps through the night and **sleeps in until 08:00**.
06:00 to 18:00 (a nap)	It gets up by itself once its **energy is full**, about 15 minutes from tired.

- From **08:00 to 18:00**, anything still asleep gets up once its energy is full.
- Turning the **screen off between midnight and 06:00** puts it to bed too.
- You can always wake it yourself with the Light button.
- Asleep, it rests (+6 energy a minute), its other needs fall slowly and never very low, and it cannot run away or make care mistakes.
- **A full night's sleep or a nap that fills its energy refills PP** for your whole team (chapter 7).

> **PRO TIP:** Before school or work, feed it, bathe it and play a joy game until all four needs read 90 or more, then put it down for a nap. It wakes rested, and you have 8 hours.

Fitness and weight

The card shows **FITNESS** (0 to 99, starting at 75) and a **weight** in kg. The weight is the species' real Pokedex weight at fitness 75, lighter above and heavier below. Fitness rises slowly by itself and with the training games. Candy and plain berries lower it. Below 50, energy drains twice as fast.

4. Growing up

Levels

Level is age: +1 level every hour, up to **level 100** (4 days and 3 hours). Care does not make it grow faster, but care mistakes delay evolution. It keeps growing while the board is off, catching up as much as two weeks.

The card (swipe up from your Pokemon, or STATS on the menu) has four pages: the profile (name, level, fitness, weight, gender, what it evolves into), its battle stats and IVs, its moves, and its progress (its level, the time to the next one and its next evolution). Drag along the edge to turn the pages. Tap the name on the profile to rename it.

Moves

A Pokemon knows up to **four moves**.

- **Level-up moves** come at the levels the games teach them. An empty slot fills by itself; with four already, the game asks which move to forget, or you can skip it.
- **The MOVES page** of the card lets you swap in **any move it could know** at its level, at any time, and as often as you like.
- **TMs** (chapter 11) teach moves a species learns only by TM. Once you own a TM it teaches every Pokemon that can learn it, at any level, as often as you like.

Evolution

When an evolution is ready, a button appears. **Tap it to watch it happen**, or tap **keep form** to wait; it asks again at the next level. An evolution needs every need at **40 or more** at that moment.

How it evolves	What to do
By level	Reach the level. Each care mistake adds a level.
By stone	Use the stone from the **BAG** on the Pokemon you are raising, at any level. Stones cost $2,100 at the Mart and turn up after wins in some areas. There is no level route.
By trade	Trade it to another board, or use a **Linking Cord** ($9,800) on it. It evolves the next time it is the one you raise.
By choice	Applin and Charcadet let you pick which form, at level 30.
Other	Tyrogue by its Attack and Defense, Wurmple and Cosmoem by the creature, Meltan by walking 10,000 steps, and a few by gender.

Eevee evolves with the Water, Thunder, Fire, Leaf or Ice Stone. With **bond 40 and at least two days old**, it becomes **Espeon** by day, **Umbreon** by night, or **Sylveon** if it knows a Fairy move.

Evolving teaches moves. The new form learns the level-up moves it has already passed, so a late evolution does not leave empty slots.

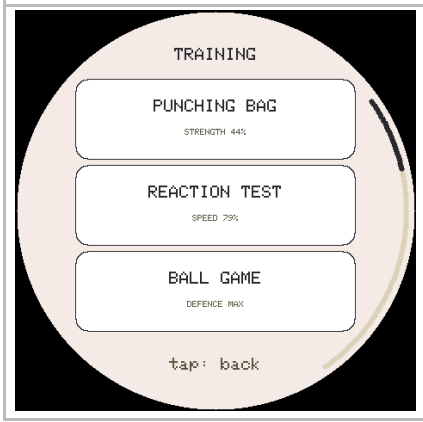

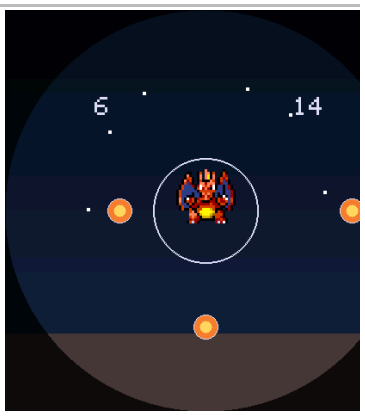

Gender

Most species are male or female, half and half, fixed when the Pokemon hatches or is caught. The card shows it beside the name. Some species are always one gender or have none. Gender decides a few evolutions: Burmy, Combee, Salandit, and the Dawn Stone for Kirlia and Snorunt.

5. Training

Training makes a Pokemon stronger in battle. Each stat (**Attack**, **Defense**, **Speed**) has a training value from 0 to 100. Special Attack runs off Attack training and Special Defense off Defense training.

The training games

The list	Rock Smash	Block!
		

Tap the **dumbbell** to see the list. Each row says what the game raises and how far along that stat already is.

Game	Raises	How to play
Punching Bag	Attack	Tap to punch. About 4 hits make a point.
Reaction Test	Speed	Tap each target before it shrinks away.
Ball Game	Defense (and a little joy)	Keep the ball in the air.
Rock Smash	Attack + Speed	Tap as the ring lands on the rock. Perfect timing scores double.
Block!	Defense + Speed	Tap the side an attack comes from. Tapping an empty side wobbles your shield.
Tilt Maze	Speed + Defense	Tilt the board to roll the ball into the green goal. Needs the motion sensor.

Game	Raises	How to play
Boulder Push	Attack + Defense	Tap while the needle is in the green. Tapping outside the middle slips the boulder back.
Berry Catch	Joy + bond	Drag the basket to catch berries; dodge the rocks.
Memory	Joy + bond	Repeat the berries' sequence.
Hide and Seek	Joy + bond	Follow the bush your Pokemon hid in.

- A session pays at most **18 training points**. A game that trains two stats splits them (9 + 9).
- **It costs what it pays:** a full session costs **12 energy and 5 food**, a smaller one less, and a round that earned nothing costs nothing.
- Below **15 energy** a Pokemon is **TOO TIRED** to train. The joy games still open.
- Leaving a game early keeps what you earned. The result screen says what you got, and a zero says why (**MAX**, **JOY MAX**, or **BOND MAX TODAY**: bond can rise at most 20 a day).

How far a Pokemon can train

Every Pokemon has four **IVs** (0 to 31, rolled when it hatches and never changing; here between 8 and 31). They add a little to each stat, and they also set its **training ceiling**: **70 + 30 × IV / 31**. An IV of 31 can train to 100; an IV of 8 stops at 77. The card's battle page shows its IVs, with a perfect 31 highlighted.

Training counts more as a Pokemon grows. In battle, training adds training × level / 100 to a stat: full training is +100 at level 100 and +14 at level 14. The training screen shows the 0 to 100 value; the card shows the real battle numbers.

Other ways to train

- **Vitamins** (Protein, Iron, Carbos) give +10 training each. With a party, the bag asks who gets it.
- **Gym wins** train the Pokemon you are raising, if it fought: 3 to 5 points on easy, 6 to 10 on hard, a little more deeper into the ladder, always in a stat that still has room.
- **Defense** also rises by 1 for each hour your Pokemon spends happy and well.

6. Endings and new eggs

Every Pokemon's time with you ends one of three ways. You choose and watch each one.

Ending	When	What happens
Farewell	Offered once it is in its **final form** and has lived **3 days** (level 73)	It joins your **party**, and your next egg is **blessed**. You can say "stay together" and it asks again a day later.
Release	Any time: hold your Pokemon on the main screen for 3 seconds	It joins your party, and the next egg is ordinary.
Run away	All four needs at zero for an hour	It is gone for good, and the next egg can only be **common**.

RETIRE on the menu ends a Pokemon whenever you like. Retiring one that has earned its farewell is the same as the farewell. Retiring one that has not loses it for good, and its next egg evolves a day later.

A Pokemon waiting for an evolution by trade counts as final for its farewell, unless it is already marked to evolve.

The next egg

After any ending a new egg appears. **The pill under the egg** picks its region (any region whose pack you have, or ALL). The rarity the egg rolled stays when you switch, and each region remembers its answer, so switching cannot fish for a rare one.

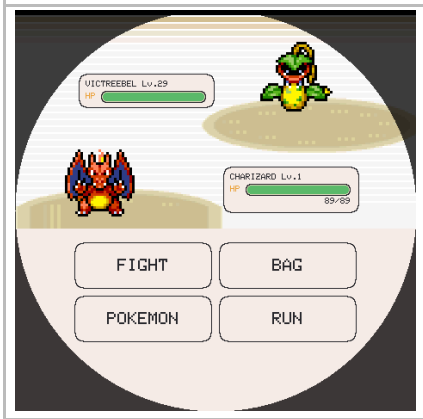

Egg	Ordinary	After a farewell
Legendary	about 3%	about 10%
Rare	about 27%	about 45%
Common	the rest	the rest

- Legendary eggs start only once you have **registered 25 species**.

- A long **daily streak** and a strong **bond** raise these odds.
- An egg prefers species whose evolution line you have not finished, so every Pokemon can be collected.
- **Shiny:** a farewell egg is shiny about 1 time in 100, other eggs 1 in 200. The best streak and bond make that up to 4 times likelier.
- **Story legendaries do not hatch.** They live in Explore. Mythicals (Mew, Celebi and the others) still come from eggs.

7. Battle basics

The battle screen

The menu	Picking a move	Blacked out
		

Your Pokemon is at the bottom left, the opponent at the top right, each with an HP bar. The menu has four choices:

FIGHT	Pick one of your four moves. Each shows its type and the PP left.
BAG	Use an item: a ball, a potion, a Full Heal or an X item. It takes your turn.
POKEMON	Switch to another team member. It takes your turn.
RUN	Escape a wild Pokemon. Anywhere else, running counts as a **loss**, and it asks first.

Damage

- **Types matter.** A super effective hit does double damage, a resisted one half, and some types cannot hurt others at all. See the type chart.
- **Same type bonus:** a move that matches one of its user's types does 1.5x damage.
- **Critical hits** land about 1 time in 16, for 1.5x damage, and ignore the stat changes that would weaken the hit.
- **Stat changes** go from -6 to +6 and reset when a Pokemon switches out. Many attacks change a stat as well as doing damage.

Status problems

Problem	Effect
Paralysis	Speed halved; loses a turn 1 time in 4. Electric types are immune.
Burn	Attack halved; loses 1/16 of its HP each turn. Fire types are immune.
Poison	Loses 1/16 of its HP each turn. Poison and Steel types are immune.
Sleep	Cannot move for 2 to 4 turns.
Freeze	Cannot move; thaws 1 time in 5 each turn. Ice types are immune.
Confusion	Hurts itself instead of moving about 1 time in 3, for a few turns.

A **Full Heal** cures them. They all end with the battle.

PP

Every move has its real PP: TACKLE 35, SURF 15, RECOVER 5. Each use costs 1. **Your PP carries from fight to fight**, and comes back for your whole team when the Pokemon you are raising fills its energy while asleep. With no PP left in any move, it uses **STRUGGLE**, which hurts the user too. Opponents always start full.

Two-turn moves

DIG, FLY, BOUNCE, DIVE and SHADOW FORCE take the user out of reach for a turn, then strike. While it is away, attacks aimed at it miss, except the moves that can reach it:

Hidden by	Still hit by
DIG	EARTHQUAKE, for double damage
FLY, BOUNCE	GUST for double; THUNDER, HURRICANE and SKY UPPERCUT
DIVE	SURF, for double damage
SHADOW FORCE	nothing

Faints and switching

- **You choose who comes on** after one of yours faints. It costs no turn.
- **Against a trainer**, when their Pokemon faints you are told what they send next and may switch first, for free. Tap NO to keep yours out.
- **On hard**, trainers send the Pokemon that suits the fight best.

Losing

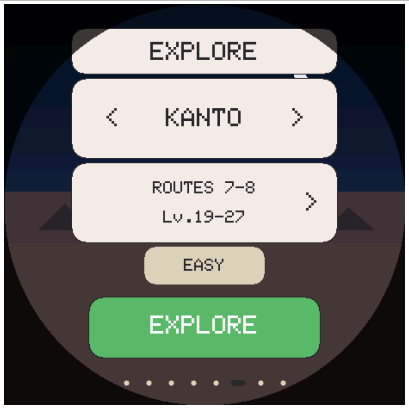

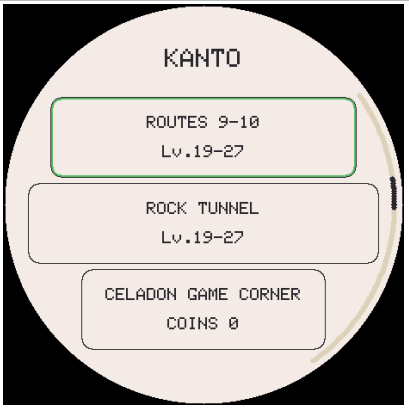

If your whole team faints, you **black out**: Mom is waiting at home and your team is all better. Nothing is taken from you. A LAN battle never blacks out.

Special moves

- **SKETCH** (Smeargle) copies the last move the opponent used, **for good**. A failed Sketch keeps its PP.
- **TRANSFORM** (Ditto) turns Ditto into the opponent for the fight: its look, type, stats and moves. It is a Ditto again afterwards.

8. Exploring and catching

Explore

Explore	An area list	A wild Pokemon
		

Swipe right from your Pokemon to **EXPLORE**. Pick a **region** with the arrows at the top, then tap the **area row** to choose where to go. Then pick **easy** or **hard** and tap the big button to meet a Pokemon.

- **Areas open with badges**, as in the games. A locked area says what it needs, for example **REQUIRES BOULDER BADGE**. A badge won on easy or hard both count.

- **Levels follow the gym ladder**, not your Pokemon: an area's Pokemon are a little below the next leader you will face. A few evolved Pokemon appear above the area's levels, where the games put them.
- **Easy or hard** does not change levels. On hard, wild Pokemon fight smarter and you get better drops.
- **Time and weather.** In Johto, Sinnoh and Paldea some Pokemon come out only in the morning, by day or at night. In Galar and Paldea each wild zone has one **weather a day**, shown on its row (for example `Lv.26-34 FOG`), and some Pokemon come only in their weather.
- **Swarms.** Some days an area has a **swarm** of one Pokemon, shown as **SWARM** on its row.
- **NEEDS PACK** means that region's sprite pack is missing. **NO VALID SPRITES** means nothing in that area can be drawn yet.
- A small **ball** on a wild Pokemon's name plate means you already own one.

Legendaries and one-off encounters

- **Legendaries live where they did in the games.** The **first visit** to its home, once you have the right badge, **always meets it**. After that it comes back now and then until you catch it. A few **roam** their whole region after the first meeting.
- **One-offs** stand where the games put them: the sleeping Snorlax, Sudowoodo, Lapras on Fridays, the red Gyarados and a few more. They work the same way.
- A row shows `* AREA *` when a legendary's certain meeting is waiting, and `! AREA !` for a one-off.

Catching

Weaken it first, then throw a ball from the **BAG**. Throwing takes your turn.

- A ball works better the lower its HP and if it has a status problem. A Great Ball is 1.5 times a Poke Ball, an Ultra Ball twice, and a **Master Ball** never fails.
- A wild Pokemon may **run away** when it is low on HP, most often at about a fifth of its HP. It stops running when it is nearly beaten, which is the best moment to throw.
- **RUN** from a wild Pokemon usually works, less often against one well above your level.
- A caught Pokemon goes to your **party**, then to **Bill's PC**.

Drops

A won wild battle gives **one item**, and a second 25% of the time on easy or 50% on hard. On top of that, a win may bring a **TM** you do not own (5% easy, 8% hard), and in some areas an **evolution stone** (about one win in 25). The items and their chances are in Appendix B.

Safari Zones

Kanto's **Safari Zone**, Hoenn's **Safari Zone** and **Safari Extension**, and Sinnoh's **Great Marsh** work like the games: **no team of yours fights**, and each encounter brings **30 Safari Balls** of its own. Instead of FIGHT, you get that game's tools:

Where	Choices
Kanto	BALL, BAIT (it eats and stays, but is harder to catch), ROCK (easier to catch, but angry and likelier to flee), RUN
Hoenn	BALL, POKEBLOCK (less likely to flee), GO NEAR (easier to catch, but likelier to flee), RUN
Sinnoh	BALL, BAIT, MUD, RUN

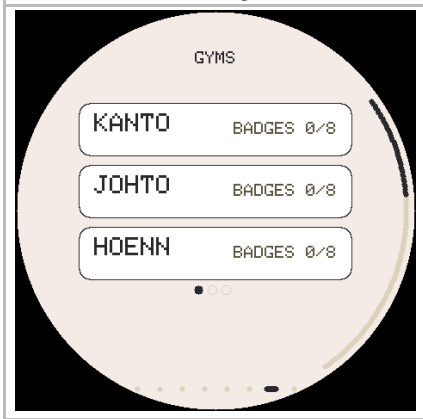

See The Safari Zones for the best pattern for each Pokemon.

The Game Corners

Two areas are not wild areas: **CELADON GAME CORNER** (Kanto, after Lt. Surge) and **GOLDENROD GAME CORNER** (Johto, after Bugsy). Buy coins with your money, play slots or card flip, and trade coins for Pokemon and TMs. See The side games.

9. Gyms and the Pokemon League

Swipe to **GYM**, pick a region, and tap a leader.

Pick a region	A ladder	Your team
		

- **Nine regions**, each with **8 gym leaders** (Alola has trial captains and kahunas), **4 Elite Four members** and a **champion**. Leaders open in order.
- **Easy or hard.** On easy, leaders have average IVs and no training. On hard, they have perfect IVs, training and smarter battle choices, and you may bring only as many Pokemon as they have. Each difficulty keeps its own badges.
- **Level limit.** Your team fights at the leader's best level at most, on both difficulties, so a level 100 team cannot simply overpower Brock.
- **Picking your team.** Tap Pokemon in the order you want them to fight; the number on each card is its place, and **1 leads**. The picker remembers your last team.
- **Prize money.** Every win pays. Hard pays twice what easy pays, and a rematch half again.
- **Training.** A win trains the Pokemon you are raising, if it fought.

The League

The **Elite Four and the champion are one run**. Beating the first Elite Four member starts it; between fights the **League screen** offers **NEXT**, **BAG** and **GIVE UP**.

- **HP comes back every fight, but PP does not**, and you cannot put your Pokemon to bed during the run.
- The run ends if you **lose**, **give up**, take **more than an hour**, or beat the **champion**. Badges you won are kept, but the next run starts again at the first Elite Four member.

> **PRO TIP:** Bring **Ethers** and put **PP Ups** on your best moves before a League run. Running out of PP against the champion is the usual way to lose.

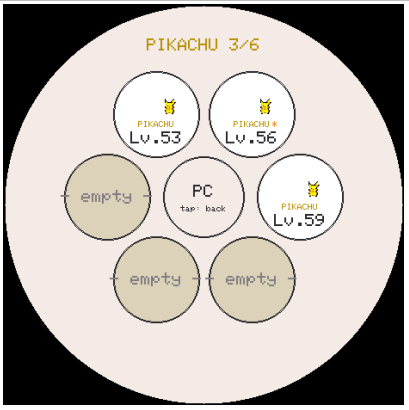

10. Your collection

The party

PARTY holds **six** Pokemon. Tap one to open its card.

- **RAISE THIS ONE** swaps it with the Pokemon you are raising. Nothing is lost either way, and each keeps its care state.
- **TO PC** puts it in Bill's PC. **RELEASE** lets it go for good (it asks first).
- A Pokemon in the party keeps its level until you raise it again.

Bill's PC

The PC's grid	A species' six	The Pokedex
		

Bill's PC holds up to **six of every species**. Open it from the middle of the party ring.

- Pick a region, and every species is a square: **in color** with a count if the PC holds it, **outlined** if only your party (or the one you raise) has it, **grey** otherwise.
- Tap a species to see its six; a Pokemon's card offers **TO PARTY** and **RELEASE**.
- **GO TO #** jumps to any Pokedex number. **MISSING ONLY** shows only the species you do not have.
- A **seventh** of one species needs a free party slot, or you choose one of the six to let go.

The Pokedex

The menu's **POKEDEX**, or the POKEDEX screen, browses one region at a time.

- A species is **in color** once it has been yours: raised, held now, or a legendary or one-off you caught. Anything else is a silhouette.
- The **green dot** means **registered**: you raised it. Registering is what the Pokedex counts, and it happens when you **raise** a Pokemon, not when you catch it.
- **OWNED** counts the species you have right now.
- Shinies are counted separately.

Your player card

Swipe all the way left to **PLAYER**: your trainer name (tap it to change it), your **avatar** (tap it to choose one of 19), your **badges** (a page per region), and your **medals**.

- **Streak:** caring for your Pokemon on consecutive days. Milestones at 3, 7, 30 and 100 days. Missing a day breaks it.
- **Bond:** how close you are to this Pokemon, from 0 to 100. Petting, favorite berries and the joy games raise it, at most **20 a day**; neglect cools it.
- **Medals:** level 10, 25 and 50, favorite berry found, a 7-day streak, max bond, final form, and "fit" (fitness 80 or more with no care mistakes).
- A strong streak and bond make the **next** egg better: rarer, likelier to be shiny, and with higher IVs.

11. Money and the Poke Mart

- **Walking earns money: $1 a step**, up to $999,999. The board counts your steps while you carry it.
- **Trainer wins pay** too (chapter 9). Wild battles and LAN battles pay nothing.

Buying and selling

The Mart	Buying
	

Swipe to **MART**. Tap **BUY** or **SELL** at the top.

- **Buy:** balls, potions, vitamins, stones, X items, the Linking Cord and PP Up. Prices are in Appendix B.
- **TMs:** the Mart sells **five TMs a day**, a different five each day. A TM you own is never offered again.
- **Sell:** the Mart buys anything it sells for **half the price**. It does not buy what it never sells (the Master Ball, Ether, PP Max, Bottle Cap).

Using items

Open the **BAG** from the menu.

Item	How to use it
Vitamins	+10 training. With a party, the bag asks who gets it.
Stones	Use on the Pokemon you are raising to evolve it.
Linking Cord	Marks the Pokemon you are raising to evolve as if traded. Kept if it would do nothing.
PP Up	Pick a Pokemon and a move: that move gets a fifth more PP, up to three times. It stays with the Pokemon.
PP Max	Fills every PP Up a move still has room for, at once.
Ether	10 PP back to one move.
Bottle Cap	Raises one IV of your choice to 31.
Balls, potions, Full Heal, X items	In battle only, from the battle's BAG.

A Pokemon in Bill's PC must come out to the party first.

12. Playing with friends

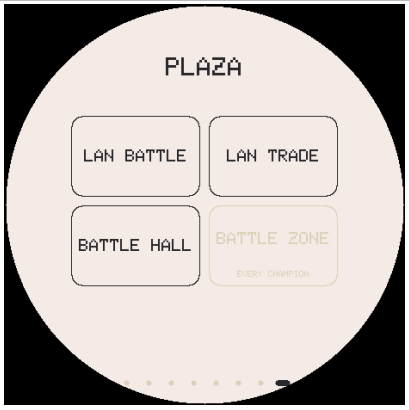

Two boards talk to each other over the air, no router needed. Both go to the **PLAZA** (swipe all the way right).

LAN battles

Tap **LAN BATTLE** on both boards, then **HOST BATTLE** on one and **JOIN BATTLE** on the other, and pick your teams. There is no level or team limit.

- Your **record against each rival** is kept and shown when you pair up.
- Each player picks their own next Pokemon after a faint.
- No items, and no free switch when the rival's Pokemon faints.
- **Running is a forfeit** and counts as a loss. If your rival stops answering, **QUIT** appears after a while and does not count.
- PP is counted during the fight, but your saved PP is not touched.

Trading

The PLAZA	Choosing	A dropped connection
		

Tap **LAN TRADE** on both boards. They find each other.

1. Tap **YOU GIVE** and choose from your party, or from **Bill's PC** (the middle of the ring). Each Pokemon's card shows first: **TRADE** offers it, **BACK** goes back.
2. Your friend's offer appears under **YOU GET**.
3. Both tap **ACCEPT**. Changing either offer cancels both acceptances.

- You cannot trade the Pokemon you are raising.
- A Pokemon that evolves by trade arrives marked and evolves the next time you raise it.
- **Keep both boards close and switched on** until it finishes. If the connection drops, nothing is lost or copied: both boards keep trying for 5 minutes. After that, each screen says what that board holds. Look at your friend's screen: if it says **complete**, choose **KEEP**; if it says **incomplete**, choose **REVERT**.

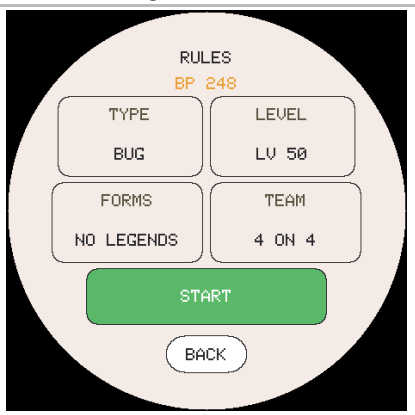

13. The Battle Hall

The Hall

On the **PLAZA**, open to everyone. Your Pokemon alone, one on one, against one Pokemon of **each of the 18 types**.

- **Your worst matchups come first**, while the opponents are weakest; the types your Pokemon beats come last, when they are strongest.
- Opponents start 3 levels below yours and reach your level at the 18th.
- **Each battle costs 6 energy.** When your Pokemon is tired, let it rest; the run waits for you.
- It uses your Pokemon's real PP, so a nap between battles refills it. No items.
- Each win pays a little money. A loss ends the run, with no blackout.
- **Clear all 18** and your Pokemon is a **HALL CHAMPION**, shown on its card for good, even after trades.
- Changing the Pokemon you are raising ends the run.

14. The Battle Zone

The zone	The gauntlet's rules	The tournament
		

On the **PLAZA**, once you have beaten **every region's champion** (easy or hard). It pays **Battle Points (BP)**.

- **The tournament** ($2,500 to enter): 16 trainers from every region, four rounds. Opponents bring full teams at level 100, as many as you bring. PP carries through the whole tournament.
- **The gauntlet** ($1,500 to enter): challengers one after another until you lose. Set the rules (a type, a level cap, which forms, team size) or take the **DAILY** rules: the first daily run that wins a battle each day earns **double BP** for the rest of that run. **Every 20th challenger is a boss.**
- Both pay **3 BP a win**; a boss pays 10 more and the tournament title 10 more.
- **PP carries** from battle to battle and HP is full every fight. **No bag.**
- **The prize counter** sells items for BP, including **PP Max** and the **Bottle Cap** (sold nowhere else), the ten **signature-move TMs**, and five more TMs a day.
- Your runs are saved between battles. A power cut mid-battle counts as a loss.

15. Settings and keeping your save safe

Settings

Tap the name at the top, then **SETTINGS**:

- **Sound** on or off, and the **volume**.
- **Language**: English, Spanish, French, German, Italian or Portuguese.
- **SET TIME**: the hour, the minute and the **day of the week** (tap the right side for the next day, the left for the one before).

Backing up

- On the web installer, **Back up, then install** saves your game to a `.tpsave` file before installing. Keep that file somewhere safe: it is your real backup.
- The installer also keeps your last 12 backups in that browser, as a convenience. They are lost if you clear the browser's data.
- The installer can **restore** a backup file to a board.

Common problems

Problem	Fix
Black screen after installing	Hold PWR about 10 seconds, then press it again.
Pokemon show as numbers	That region's sprite pack is missing. Add it from the installer.
A red warning triangle beside the battery	Saving has stopped working. Back up from the installer straight away.
A region is greyed out	Its sprite pack is not on the card.
Day and night are wrong	Set the clock under SETTINGS > SET TIME.

Part 2: Walkthrough and Strategy

The walkthrough, region by region

Each region has its own chapter: every area in the order its badges open it, with every Pokemon, its levels and its chances, then each leader's team, moves, weaknesses and the Pokemon you can catch before the fight.

Region	Areas	Ladder	Chapter
Kanto	36	Brock to Rival	Kanto
Johto	35	Falkner to Lance	Johto
Hoenn	43	Roxanne to Wallace	Hoenn
Sinnoh	54	Roark to Cynthia	Sinnoh
Unova	43	Cheren to Iris	Unova
Kalos	30	Viola to Diantha	Kalos
Alola	54	Ilima to Kukui	Alola
Galar	39	Milo to Leon	Galar
Paldea	32	Katy to Geeta	Paldea

How to read a leader's advice: **Hit them with** lists the types that hurt most of their team. **Their attacks are** the types of their damaging moves. **Careful with** names the types those attacks hit hard. **Tested team** is measured, not guessed: for every leader, every Pokemon you can catch in that region by then was raised to the leader's level (evolving by level where it can) and battled against each of the leader's Pokemon; the six that won most were then played against the leader as a team, 40 times on easy and 40 on hard, at IVs around 20 and training 75. Nearly every leader falls to its tested team on both difficulties. The hard exceptions are Misty, Johto's champion and Sinnoh's Lucian. For those, bring a team from another region, higher IVs or full training, or X items. A League seat's number is for that battle on its own; in a League run your PP carries over, so bring PP Ups and Ethers.

Your first week

A plan for a new player. Your Pokemon grows a level an hour, so a week is a whole life and the start of the next.

Day 1. Pick your region and starter, hatch it, and set the clock. Feed it, bathe it and play until all four needs are 90 or more. Then play the training games a few times a day, and try the joy games when petting stops working. Explore the first areas on easy and catch one of each Pokemon you meet.

Day 1, evening. Your starter is about level 12. Fight the first leader on easy. The level limit means you fight at the leader's level, so a team of three or four caught Pokemon of the right type helps a lot.

Days 2 and 3. Take the next badges as their leaders' levels come within reach. Each badge opens new areas. Walk with the board for money, and buy **Great Balls** and a **stone** or two for the evolutions you want.

Day 3. Your Pokemon reaches level 73 and is offered its **farewell** once it is in its final form. Saying goodbye blesses the next egg and puts it in your party. Or keep it to reach level 100 first.

Days 4 to 7. Raise the next egg. Swap party members in with **RAISE THIS ONE** to level and train them for the later gyms. Aim for the eighth badge and the League.

> **PRO TIP:** Catch first, raise later. A Pokemon you catch keeps its level until you raise it, so catch a wide team early, and raise the ones the next leaders are weak to.

How to get every Pokemon

Every species has a row in **How to get every Pokemon**: the best wild area for it and its chance there, the egg tier it hatches in, what it evolves from and how, and any legendary meeting, one-off, swarm or prize.

The routes, in short:

- **Eggs** give every base form except the story legendaries, from eggs of its own region. The egg favors lines you have not finished.
- **The wild** has most species somewhere in Explore. A species no area offers usually comes from an egg or an evolution.
- **Evolution** gives every other form. Stone and trade evolutions need their item or a Linking Cord.
- **Legendaries** with a home are met only in Explore.
- **Prizes** from the Game Corners: Abra, Clefairy, Dratini, Scyther, Pinsir and Porygon at Celadon; Abra, Ekans, Sandshrew and Dratini at Goldenrod.

Evolutions that are easy to miss

Pokemon	How
Slowking	A Linking Cord on a Slowpoke. At level 37 it becomes Slowbro instead.
Politoed	A Linking Cord on a Poliwhirl. Otherwise it becomes Poliwrath at its level.
Scizor or Kleavor	Scyther: a Linking Cord for Scizor, the Black Augurite for Kleavor. Whichever comes first.
Melmetal	Walk 10,000 steps while raising a Meltan.
Shedinja	Have a spare Poke Ball and room when Nincada evolves.
Gallade and Froslass	The Dawn Stone on a male Kirlia or a female Snorunt.
Solgaleo or Lunala	Cosmoem becomes whichever of the two you do not own yet.
Espeon, Umbreon, Sylveon	Eevee with bond 40 and two days old: day, night, or knowing a Fairy move.
Karrablast and Shelmet	Trade them for each other, or use a Linking Cord with the other in your party.

Raising a strong Pokemon

IVs set the ceiling. A Pokemon's IVs (8 to 31) add up to about 15% between a poor one and a great one, and they cap its training. For a hard-mode team, prefer Pokemon with high IVs, shown on the card's battle page. A **Bottle Cap** raises one IV to 31.

Training fills the gap. Three stats at 100 is 300 training points: about 17 full sessions. Two-stat games pay the same total as one-stat games, so play whichever you like best. Each full session costs 12 energy, so a nap every few sessions keeps you going.

A daily routine:

1. Morning: feed, bathe, play a joy game until all needs are 90 or more. That starts the 8 hours.
2. Two or three training sessions, then a nap to refill energy (and PP).
3. Evening: top up again, train, and put it to bed after 18:00.

Evolve when it suits you. A Pokemon is usually stronger evolved, but each form learns different moves at different levels. Keep form if a move is coming soon, then evolve.

PP decides long fights. For the League, the gauntlet and the tournament, put **PP Ups** on your strongest moves and carry **Ethers**.

Build a team that covers each other. Six Pokemon of different types with different attacking moves beat six strong Pokemon of one type. Check each leader's weaknesses in the region chapters.

> **PRO TIP:** Vitamins work on party members, so a team can be trained without swapping each one in. Raising a Pokemon also levels it; a party member stays at its level until you raise it again.

Spending money well

Early game (the first three badges):

- **Poke Balls and Great Balls**: enough to catch a team.
- **The stone** for an evolution you want, at $2,100.
- Sell stones and vitamins you will not use (half price).

Mid game:

- **TMs** from the Mart's daily five: one strong attack of each type you use.
- **A Linking Cord** ($9,800) for a trade evolution you want.
- **Vitamins** ($9,800 each, +10 training) only if you cannot play the training games. The games are free.

Late game:

- **PP Up** ($10,000) on your best moves before the League.
- **X items** to turn a hard fight.
- **Gym rematches** for money: every win pays, hard pays double, and a rematch pays half the first win. The champions pay the most.

> **PRO TIP:** Walking is the steadiest income. A 5,000-step day is $5,000, and it adds up while you do everything else.

Where to find every TM

Every TM, its type, power, price and where else it comes from is in **Every TM**. In short:

- **The Mart:** five TMs a day, a different five each day. Status TMs cost $2,000; attacks cost 40 × their power, from $1,500 to $5,000.
- **Wild wins:** 5% of easy wins and 8% of hard wins drop a TM you do not own.
- **The Game Corners:** Surf, Ice Beam, Thunderbolt, Flamethrower, Shadow Ball and Iron Tail at Celadon; Thunder, Blizzard and Fire Blast at Goldenrod.
- **The Battle Zone counter:** five more a day for BP, and the ten **signature-move TMs** (Roar of Time, Shadow Force, Blue Flare, Bolt Strike, Blast Burn and the rest), each for its own Pokemon only.

The Safari Zones

The short version: in Kanto, throw balls; use bait only on Chansey and Dratini. In Hoenn, throw one **Pokeblock** first at the hard-to-catch ones, and never GO NEAR more than once. In the Great Marsh, just throw balls.

The table below is measured with the game's own Safari rules, 20,000 encounters per pattern. It shows each Pokemon's chance of being caught in one encounter (30 Safari Balls) by throwing only balls, and the best pattern when another one does better.

The side games

Slots

Both Game Corners have slots: Red's machines at Celadon, Crystal's at Goldenrod. Bet 1 to 3 coins (more lines), SPIN, then STOP each reel.

- **Celadon:** wins come about 1 spin in 10 at 1 coin, 1 in 3 at 3 coins. Every so often a machine gets into a mood for 7s and BARs and stays that way until one pays. One machine is **lucky** each time you walk in.
- **Goldenrod:** stingy on 1 coin (1 win in 30), much better at 2 or 3 coins. About 1 sitting in 5 is at a lucky machine.
- **Both pay out more than they take** over a long session, as the originals did: about two coins back per coin, mostly in streaks.

> **PRO TIP:** Bet 3 coins. If a machine has gone cold for a long time, back out and sit down again for a different machine.

Card flip (Goldenrod)

24 cards: four Pokemon, each numbered 1 to 6. Guess the Pokemon, the number or both, then FLIP. 3 coins a flip pays 12 for the Pokemon, 18 for the number, 72 for both. The odds are exactly fair, so it is the steady way to turn coins into a long game. Watch **CARDS LEFT**: the deck is not reshuffled until it runs down, so late in the deck the cards already seen tell you what is left.

Prizes

Celadon	Coins	Goldenrod	Coins
Abra (level 9)	180	Abra (level 5)	200
Clefairy (level 8)	500	Ekans (level 5)	700
Pinsir (level 18)	2,500	Sandshrew (level 5)	700
Dratini (level 18)	2,800	Dratini (level 10)	2,100
Scyther (level 25)	5,500	TM Thunder, Blizzard, Fire Blast	5,500 each
Porygon (level 26)	9,999		
TM Iron Tail	3,500		
TM Surf, Ice Beam, Thunderbolt, Flamethrower	4,000 each		
TM Shadow Ball	4,500		

Coins cost **$1,000 for 50**, up to 9,999 coins.

Surfing Pikachu

There is a secret on the Kanto coast for a Pikachu that can ride the waves. Once you find it: hold the **left** side to lean forward and the **right** side to lean back (or tilt the board). Lean down the face of a wave and back up the next to build speed; fast over a crest, Pikachu jumps. In the air, rock the board

side to side for tricks, and land level. It pays coins, joy and bond.

Training game scores

- **Rock Smash:** watch the ring, not the rock. A perfect tap is within about a tenth of a second.
- **Block!:** do not tap sides with nothing coming: the shield wobbles.
- **Boulder Push:** wait for the green. A miss slips the boulder back.
- **Tilt Maze:** hold the board level when it starts: that angle counts as level.

The post-game

The Battle Hall

- **Raise its IVs.** Opponents never have perfect IVs, so a Pokemon with 31s has a real edge. Use **Bottle Caps**.
- **Train it fully** and give it moves of several types: the early opponents are your worst matchups.
- **Strong species clear far more often.** A well-trained Pokemon with average IVs clears about one run in ten.
- **Energy:** each battle costs 6. Rest between sittings; the run waits.

The gauntlet

- **PP is the limit.** HP comes back every fight but PP does not, so put **PP Ups** on your strongest moves. They are what take a good team past the first boss.
- **The first challengers are easy.** The challengers get stronger every round, and every 20th is a fully trained boss.
- **Play the daily run first** each day: its first win doubles the BP for the whole run.
- **The level cap locks out** Pokemon above it. Raise a second team for level 50 rules.

The tournament

- A full, strong team of six wins almost every time. Bring six.
- Opponents bring as many as you, at level 100, so a small team does not make it easier.
- It is the quick way to turn money into BP.

Spending BP

Battle Hall	6 energy a battle
Battle Zone	tournament $2,500, gauntlet $1,500; 3 BP a win

Appendix C: Glossary and common questions

Word	Meaning
IV	A Pokemon's hidden strength in each stat, 8 to 31, fixed when it hatches. Also its training ceiling.
Training	0 to 100 per stat, from the training games, vitamins and gym wins.
PP	How many more times a move can be used. Comes back with a full rest.

Word	Meaning
Bond	How close you are to this Pokemon, 0 to 100.
Streak	Days in a row you have cared for your Pokemon.
BP	Battle Points, the Battle Zone's currency.
Registered	A species you have raised. What the Pokedex counts.
Owned	A species you have right now.
Final form	A Pokemon that evolves no further.
Care mistake	A need at 10 or below after the 8 hours. Each delays evolution a level.

Why does my Pokemon show a number instead of a picture? Its region's sprite pack is not on the card. Add it from the web installer.

Why can't I evolve? Check the card: it says what it needs (a level, a stone, a trade). Every need must be 40 or more, and care mistakes add levels.

Why didn't my Pokemon learn its move? With four moves it asks which to forget. If you skipped it, swap it in from the MOVES page any time.

Why won't it train? Under 15 energy it is too tired. Let it nap.

Why are my moves running out? PP carries over between fights. A full night's sleep or a full nap refills it.

Can I lose a Pokemon in a trade? No. If the connection drops, both boards keep trying, and then you choose KEEP or REVERT by looking at your friend's screen.

Where is the legendary? In its home area in Explore, once you have the badge it needs. Its row shows a star until you have met it. See the region chapters.

Is the Master Ball worth saving? Yes. Save it for a legendary or a Safari Pokemon that keeps fleeing.

Kanto

Kanto has 36 Explore areas and a ladder of 8 gyms, 4 Elite Four seats and a champion. Its areas come from FireRed and LeafGreen (both versions).

How to read the tables: **Chance** is the share of that area's encounters, once the whole story is open. **Level** is what you meet. A Pokemon marked *later in the story* shows up only after more badges.

Johto

Johto has 35 Explore areas and a ladder of 8 gyms, 4 Elite Four seats and a champion. Its areas come from Crystal.

How to read the tables: **Chance** is the share of that area's encounters, once the whole story is open. **Level** is what you meet. A Pokemon marked *later in the story* shows up only after more badges. Johto, Sinnoh and Paldea change with the clock: morning is 04:00-10:00, day 10:00-18:00, night 18:00-04:00 (a board with no clock counts as day).

Hoenn

Hoenn has 43 Explore areas and a ladder of 8 gyms, 4 Elite Four seats and a champion. Its areas come from Emerald.

How to read the tables: **Chance** is the share of that area's encounters, once the whole story is open. **Level** is what you meet. A Pokemon marked *later in the story* shows up only after more badges.

Sinnoh

Sinnoh has 54 Explore areas and a ladder of 8 gyms, 4 Elite Four seats and a champion. Its areas come from Platinum.

How to read the tables: **Chance** is the share of that area's encounters, once the whole story is open. **Level** is what you meet. A Pokemon marked *later in the story* shows up only after more badges. Johto, Sinnoh and Paldea change with the clock: morning is 04:00-10:00, day 10:00-18:00, night 18:00-04:00 (a board with no clock counts as day).

Unova

Unova has 43 Explore areas and a ladder of 8 gyms, 4 Elite Four seats and a champion. Its areas come from Black 2 and White 2 (both versions).

How to read the tables: **Chance** is the share of that area's encounters, once the whole story is open. **Level** is what you meet. A Pokemon marked *later in the story* shows up only after more badges.

Kalos

Kalos has 30 Explore areas and a ladder of 8 gyms, 4 Elite Four seats and a champion. Its areas come from X and Y (both versions).

How to read the tables: **Chance** is the share of that area's encounters, once the whole story is open. **Level** is what you meet. A Pokemon marked *later in the story* shows up only after more badges.

After the champion

Alola

Alola has 54 Explore areas and a ladder of 8 trials, 4 Elite Four seats and a champion. Its areas come from Sun and Moon (both versions).

How to read the tables: **Chance** is the share of that area's encounters, once the whole story is open. **Level** is what you meet. A Pokemon marked *later in the story* shows up only after more badges.

Galar

Galar has 39 Explore areas and a ladder of 8 gyms, 4 Elite Four seats and a champion. Its areas come from Sword and Shield (both versions).

How to read the tables: **Chance** is the share of that area's encounters, once the whole story is open. **Level** is what you meet. A Pokemon marked *later in the story* shows up only after more badges.

Paldea

Paldea has 32 Explore areas and a ladder of 8 gyms, 4 Elite Four seats and a champion. Its areas come from Scarlet and Violet (both versions).

How to read the tables: **Chance** is the share of that area's encounters, once the whole story is open. **Level** is what you meet. A Pokemon marked *later in the story* shows up only after more badges. Johto, Sinnoh and Paldea change with the clock: morning is 04:00-10:00, day 10:00-18:00, night 18:00-04:00 (a board with no clock counts as day).

Gym 3: Iono (Levincia) -- the Electric Badge

Electric specialist. 4 Pokemon, best level 24: your team fights at level 24 at most, and on hard you bring 4 at most. Prize money: $1,200 on easy, $2,400 on hard (half again for a rematch).

Pokemon	Type	Level	Moves
Wattrel	Electric/Flying	23	Spark, Thundershock, Peck, Quick Attack
Bellibolt	Electric	23	Spark, Thundershock, Water Gun, Tackle
Luxio	Electric	23	Spark, Thundershock, Bite, Quick Attack
Mismagius	Ghost	24	Shadow Sneak, Psybeam, Magical Leaf, Confusion

Hit them with Dark, Ghost, Rock moves. **Their attacks are** Normal, Water, Electric, Grass, Flying, Psychic, Ghost, Dark. **Careful with** Water, Fighting, Ground Pokemon: several of those attacks hit them hard. **Tested team:** Farigiraf, Salazzle, Greedent, Deino, Umbreon, Cyclizar. Chosen by simulated battles from the Pokemon you can catch in Paldea by this point, raised to level 24 and evolved by level where they can; with IVs around 20 and training 75 it won **100%** of battles on easy and **100%** on hard (bringing the first 4).

Gym 4: Kofu (Cascarrafa) -- the Water Badge

Water specialist. 3 Pokemon, best level 30: your team fights at level 30 at most, and on hard you bring 3 at most. Prize money: $1,500 on easy, $3,000 on hard (half again for a rematch).

Pokemon	Type	Level	Moves
Veluza	Water/Psychic	29	Water Pulse, Aqua Jet, Tackle
Wugtrio	Water	29	Water Pulse, Slam, Aqua Jet, Water Gun
Crabominable	Fighting/Ice	30	Ice Punch, Slam, Dizzy Punch, Rock Smash

Hit them with Grass, Electric, Fairy moves. **Their attacks are** Normal, Water, Ice, Fighting. **Careful with** Ground, Rock Pokemon: several of those attacks hit them hard. **Tested team:** Gyarados, Dondozo, Lucario, Vaporeon, Overqwil, Scovillain. Chosen by simulated battles from the Pokemon you can catch in Paldea by this point, raised to level 30 and evolved by level where they can; with IVs around 20 and training 75 it won **100%** of battles on easy and **100%** on hard (bringing the first 3).

Gym 5: Larry (Medali) -- the Normal Badge

Normal specialist. 3 Pokemon, best level 36: your team fights at level 36 at most, and on hard you bring 3 at most. Prize money: $1,800 on easy, $3,600 on hard (half again for a rematch).

Pokemon	Type	Level	Moves
Komala	Normal	35	Slam, Defense Curl

Pokemon	Type	Level	Moves
Dudunsparce	Normal	35	Ancientpower, Screech, Defense Curl
Staraptor	Normal/Flying	36	Double-Edge, Close Combat, Take Down, Aerial Ace

Hit them with Fighting, Rock, Ice moves. **Their attacks are** Normal, Fighting, Flying, Rock. **Careful with** Ice, Bug Pokemon: several of those attacks hit them hard. **Tested team:** Magnezone, Glimmora, Corviknight, Electrode, Rotom, Slaking. Chosen by simulated battles from the Pokemon you can catch in Paldea by this point, raised to level 36 and evolved by level where they can; with IVs around 20 and training 75 it won **100%** of battles on easy and **100%** on hard (bringing the first 3).

The Pokemon League

The four Elite Four seats and the champion are one run: HP comes back for every fight, PP does not, and you cannot put your Pokemon to bed until it ends. See the League.

Elite Four, seat 1: Rika

Ground specialist. 5 Pokemon, best level 58: your team fights at level 58 at most, and on hard you bring 5 at most. Prize money: $2,900 on easy, $5,800 on hard (half again for a rematch).

Pokemon	Type	Level	Moves
Whiscash	Water/Ground	57	Earthquake, Earth Power, Aqua Tail, Water Pulse
Camerupt	Fire/Ground	57	Earthquake, Earth Power, Lava Plume, Flamethrower
Donphan	Ground	57	Earthquake, Giga Impact, Slam, Bulldoze
Dugtrio	Ground	57	Earthquake, Earth Power, Dig, Bulldoze

Pokemon	Type	Level	Moves
Clodsire	Poison/Ground	58	Earthquake, Sludge Wave, Megahorn, Poison Jab

Hit them with Water, Ice, Grass moves. **Their attacks are** Normal, Fire, Water, Poison, Ground, Bug. **Careful with** Grass, Fire, Rock Pokemon: several of those attacks hit them hard. **Tested team:** Baxcalibur, Dragonite, Gyarados, Golduck, Slaking, Goodra. Chosen by simulated battles from the Pokemon you can catch in Paldea by this point, raised to level 58 and evolved by level where they can; with IVs around 20 and training 75 it won **100%** of battles on easy and **100%** on hard (bringing the first 5).

Elite Four, seat 2: Poppy

Steel specialist. 5 Pokemon, best level 59: your team fights at level 59 at most, and on hard you bring 5 at most. Prize money: $2,950 on easy, $5,900 on hard (half again for a rematch).

How to get every Pokemon

One row per species, in Pokedex order. **Wild** is the best area for it and its share of that area's encounters (with the whole story open). **Egg** is the tier it hatches in, from eggs of its own region: common, rare, or legendary (legendary eggs start once 25 species are registered). **From** is the Pokemon it evolves from and how. A species with no art yet cannot appear anywhere until its sprite exists.

Every TM

A TM, once owned, teaches any of your Pokemon that can learn its move, as often as you like. Every TM below can come from three places: **the Poke Mart** (five a day, a different five each day, at the price shown), **a won wild battle** (5% of wins on easy, 8% on hard, always one you do not own), and **the Battle Zone counter** (five a day that the Mart is not selling, for BP). A few are also Game Corner prizes. You never get a TM you already own.

Stop here if you want to find the game's secrets yourself. Everything below is hidden in the game on purpose.

Secrets

Secret codes

Codes are tapped in the **Memory** game, during the **watch** phase, while the berries are still lighting up: eight taps on the berries, where 0 is the top berry, 1 the right, 2 the bottom and 3 the left.

Code	Taps	What it does
CELADON	0 1 2 3 0 1 2 3 (around clockwise, twice)	Opens Celadon Game Corner for this visit
GOLDENROD	0 3 2 1 0 3 2 1 (around anticlockwise, twice)	Opens Goldenrod Game Corner for this visit
SURF	0 2 0 2 1 3 1 3	Opens Surfing Pikachu for this visit
ZONE	1 1 3 3 1 1 3 3	Opens the Battle Zone for this visit
SETTINGS	0 0 2 2 3 1 3 1 (up up down down left right left right)	The hidden settings
CHEATS	2 2 0 0 1 3 1 3 (the same, upside down)	The cheats

The four that open a place leave no mark: coins, BP and scores you earn there are kept.

Hidden settings

The **SETTINGS** code opens rule changes. Turning **any** of them on puts a permanent **MODIFIED RULES** mark on your player card, even if you turn it off again. None of them apply in LAN battles or trades.

Setting	What it changes
No farming lockout	Every release egg keeps its legendary chance (see the hidden rules)
Safety net at 5	A legendary farewell egg after 5 without one, not 10
Legendary eggs	Story legendaries can hatch from eggs too
All in Explore	The mixed ALL region appears in Explore
No gym level cap	Your team fights at its own level in gyms
No hard team cap	Bring six against any hard leader
Companions grow	A companion that has stopped growing ages and evolves again
No daily bond cap	Bond can rise more than 20 a day
No runaways	A neglected Pokemon never runs away
Necrozma: UB met	Necrozma appears once all seven Ultra Beasts are met, not caught
Classic stats	Training adds its full value at every level
Lucky slots	Every slot machine you sit at is a lucky one

Cheats

The **CHEATS** code opens a list of cheats. Using **any** of them puts a permanent **CHEATS USED** mark on your player card. A Pokemon a cheat changed directly carries its own mark, which goes with it in trades and shows in LAN battles. No cheat works in LAN battles or trades.

Cheat	What it does
+1000 coins	1,000 Game Corner coins
+1 Master Ball	One Master Ball
+100000 money	$100,000
All TMs	Every TM. A move taught from a TM you only have this way marks the Pokemon
Unlimited PP	Your side spends no PP (a switch)
All badges	Every badge in every region, on both difficulties
All areas open	Every Explore area unlocked (a switch)
Meet legendary	Your next Explore encounter is a legendary of that region

Cheat	What it does
Max training	The Pokemon you raise trains to its ceiling (marks it)
Hatch now	Hatches the egg (marks the Pokemon)
Shiny egg	The next egg hatches shiny (marks the Pokemon)
Re-roll day	A new weather and a new set of Mart TMs for today

The hidden rules

The game does not tell you these on screen.

- **The 8-hour window** is real but invisible. Nothing shows whether it is running, and a nap ending makes no sound.
- **The legendary safety net.** After **10 farewell eggs in a row** without a legendary, the next farewell egg is one, as long as your egg region still has a legendary you have not registered and you have 25 species registered. Only farewells count.
- **The farming lockout.** Releasing or retiring a Pokemon early for a quick egg works once: the first such egg since your last farewell keeps its normal legendary chance, and every one after that has **none**, until you raise a Pokemon to its farewell again.
- **The best fishing rod.** Fishing Pokemon in each area arrive only once the games would have given you their best rod: Kanto after the Rainbow Badge, Johto after the champion, Hoenn after the Feather Badge, Sinnoh and Unova after the champion, Kalos after the Fairy Badge, Alola after Lana's trial.
- **Galar's lakes.** The Wild Area's water Pokemon arrive after the Rock Badge, when the Rotom Bike can cross water.
- **Paldea's Orthworm** waits for its Titan, mapped to the Water Badge, and Area Zero's Paradox Pokemon wait for the champion.
- **Necrozma** appears only once all seven Ultra Beasts are **caught**.
- **Surfing Pikachu** opens a **SUMMER BEACH HOUSE** row in Kanto's area list, right after SEA ROUTES 19-21, when all four are true: the Pokemon you raise is a **Pikachu**, it **knows Surf** (the TM is a Celadon prize), SEA ROUTES 19-21 is open (the Soul Badge), and **every species that area offers is registered** in your Pokedex.
